Makes sense to me to let the Corps respond as part of their review. Should we send him a short letter saying we understand he made the same comments to the Corps, and expect they will respond?

Ken

Hi All,

I agree with Mark that the issues raised are outside of our purview. The Corps received the same comments on the PN and they could address them as part of their public interest review. Mr. Kasprzak does not appear to be asking for a response from EPA. Thoughts?

Thanks
Beth
